### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Diallo Crenshaw on 6-30-04

The application has been amended as follows: In claim 10, the "2" was changed to --1--.

2. The following is an examiner's statement of reasons for allowance: The closest prior art to the amended claims is Nakamichi '284 which has a fault diagnosis portion (i.e. the second decision means) that reads substantially on the fault diagnosis portion and method of the instant invention. Nakamichi '284 differs from the claims of the instant invention both in that it doesn't teach the specified absence of fuel injection, and does not teach a state judging portion or step where the fault diagnosis is performed only after the sensor is judged to be inactive. Nakamichi '284 teaches an earlier "judging" step (i.e. the first decision means) but this judging is not utilized in conjunction with the fault diagnosis in a manner that reads on the instant invention. Namely, it appears Nakamichi '284 utilizes the second decision means only when the first decision means does not detect a fault (see fig. 3 and paragraph bridging col. 6 and 7). These two distinctions over Nakamichi '284 would not have obvious to one possessing ordinary skill in the art.
